#### **New copyright developments**

There is a variety of information circulating in the media on developments related to copyright law. To clarify what these developments mean for education, I have posted a brief analysis on my website. See

<http://library.queensu.ca/library/news/story/12/07/27/copyright-update-0>.

#### **New permission services for your materials on Learning Management Systems (e.g. Moodle), other password-protected websites and print handouts**

Queen's is committed to ensuring that you can use as many materials in your course as possible. While course-packs are still available through the AMS P&CC and the Campus Bookstore, we now have a new service that will facilitate getting permissions for digitizing (scanning) print course material and articles unavailable through the Library's digital collections or reproducing them as class handouts.

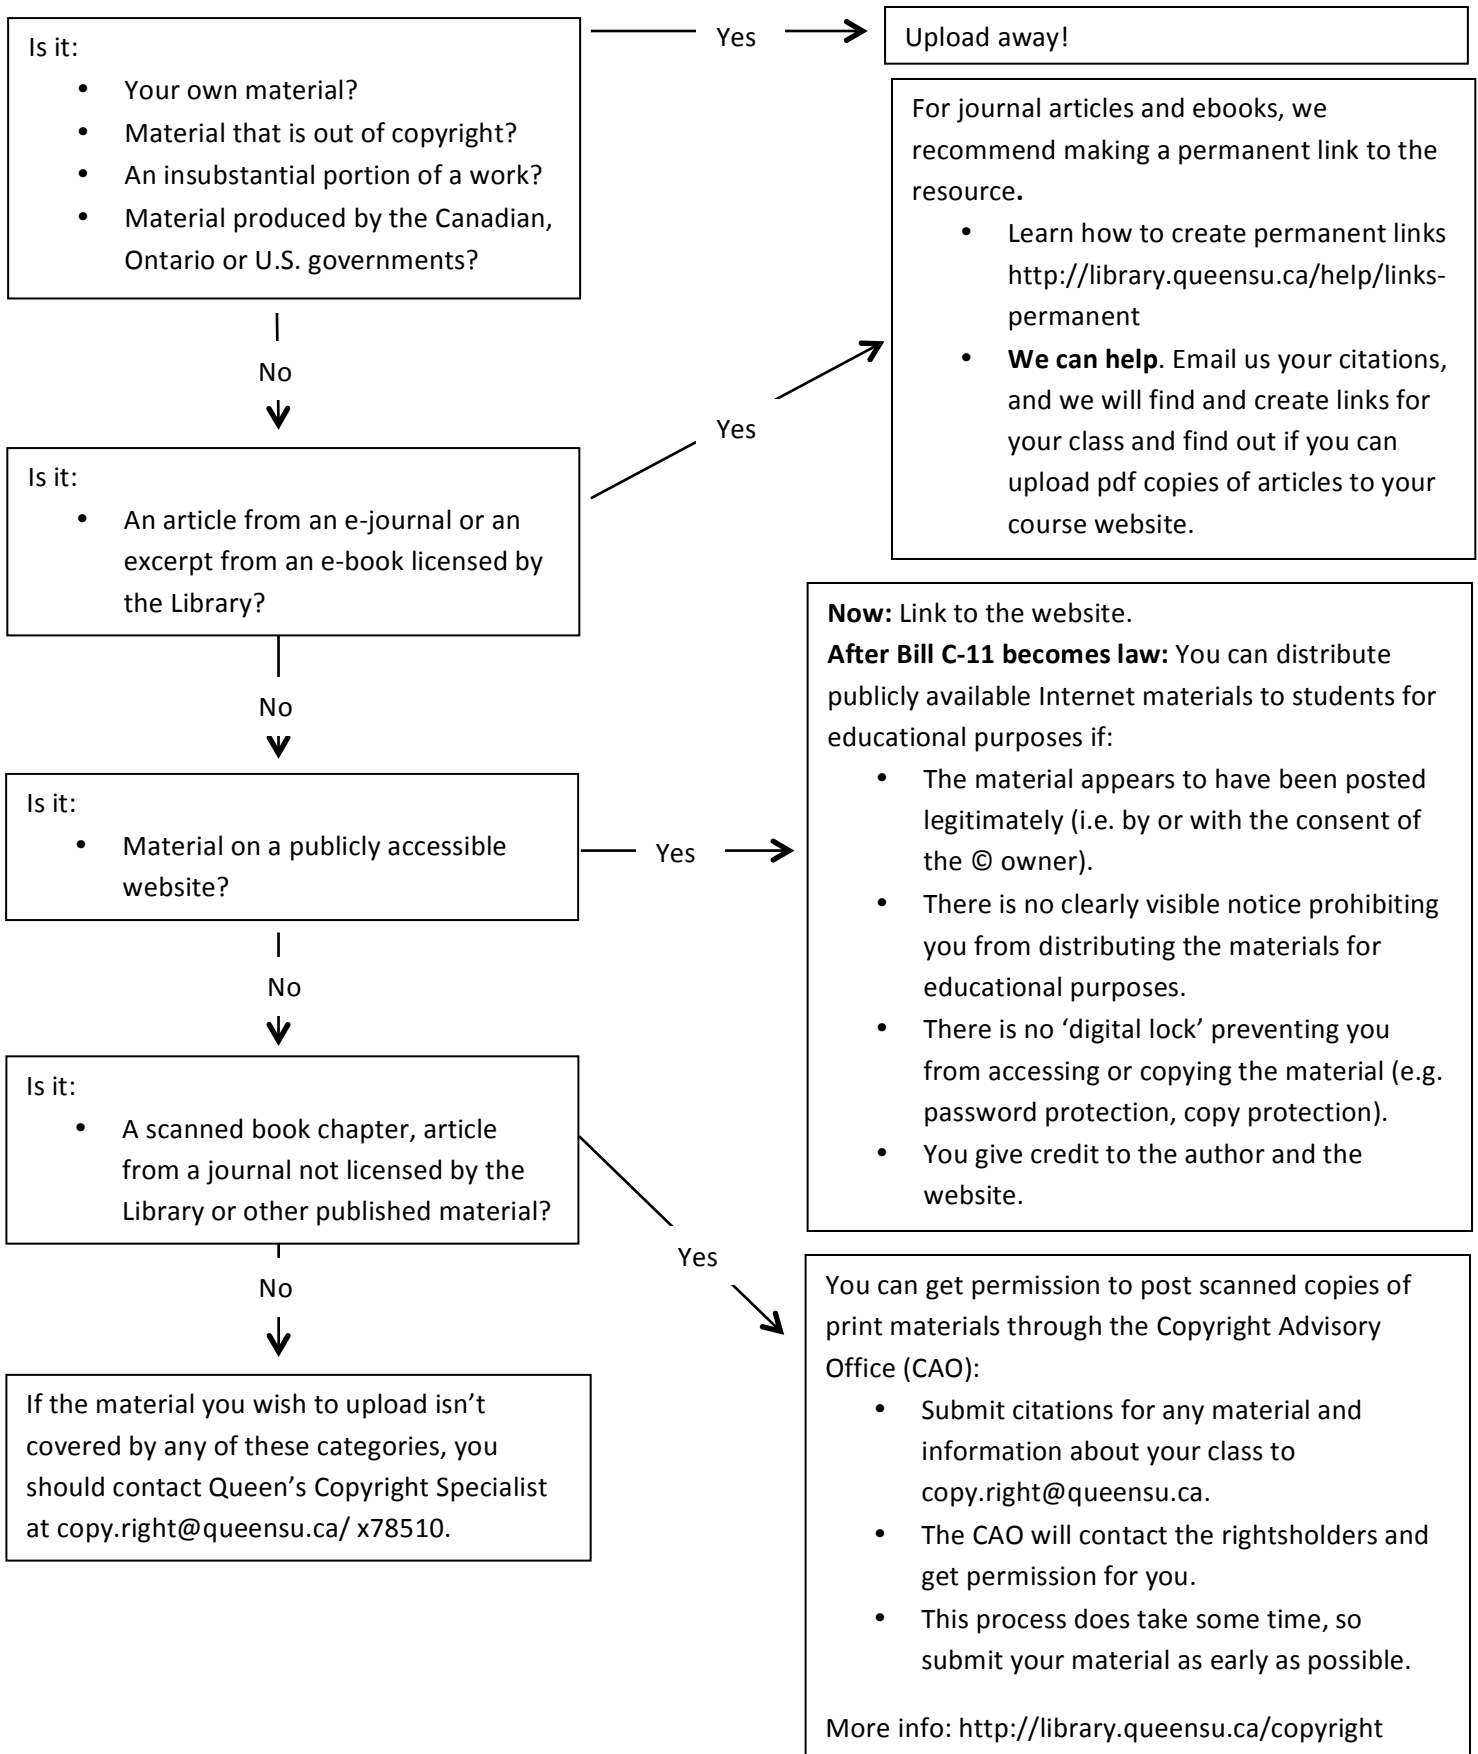

Who is this best for? If you have a small class or a limited number of items, this service can help you provide materials to your class. If you have a large class or are using a large collection of print materials, a course-pack is often still the best way to go.

Send the following to [copy.right@queensu.ca](mailto:copy.right@queensu.ca):

- Class Information (Number of Students, Course Name and Number, Course Term).
- Publication Information (Title of Work, Author, Publisher, Publication year, Journal Volume, Issue and Year (if applicable), and Page Numbers).
- How the material will be used (Handout, In Moodle, On a Password Protected Website).

After you provide this information, we will follow up with you regarding any next steps. Please wait to get confirmation from us before providing students with access to any materials submitted through this service. Please submit your materials as soon as possible, even if you have to submit material piece-by-piece. Contact with publishers can sometimes take a while, so the sooner you contact us, the better the chance of getting permission in time (3-4 weeks before your students will use the material is ideal).

# I want to upload something to a password protected course website. Can I?

## Resources for finding materials that you can use with few copyright restrictions

### In the Library

The best resource for finding material in the library is your subject librarian
