

Armineh Azizi (She/Her), Ph.D., EIT, LEED GA
Department of Civil Engineering - Postdoctoral Fellow

I am a postdoctoral fellow at the Department of Civil Engineering at Queen's University. As a postdoc, I have been leading Queens's campus wastewater surveillance of SARS-CoV-2. I am also actively participating in the bargaining committee since October 2022.

Through my work on the committee, I have taken a proactive approach to understanding and addressing postdoc issues. I have conducted research and analysis on topics such as postdoc salaries and healthcare and presented my findings to the committee in a professional manner. I have also attended social and PSAC 901 events to network with other postdocs and advocate for their rights and well-being.

If elected as Vice President Postdoctoral Scholars, I would work tirelessly to address the unique challenges facing postdocs, such as improving support for housing, increasing the minimum salary, and enhancing healthcare services. My related skills in research, analysis, and communication would help me facilitate understanding and solutions to these and other postdoc problems.

I am excited about the opportunity to serve in this capacity and would greatly appreciate your support for my candidacy. Thank you
